WARRANTY

1. General Information

The M12TX-CONFIG-SET unit allows users to configure M12TX series devices through a PC with Windows 10™ (or higher) operating system and the TTX-Platform software application.

2. Software Installation

Caution
Before connecting the M12TX-CONFIG-SET kit to a USB port of the PC, install the TTX-Platform software and its USB driver.

Step 1: Install the TTX-Platform software downloadable from **www.dwyeromega.com** on the M12TX-CONFIG-SET web page.

Step 2: Connect the kit to a open USB port on the PC and wait for the communication driver to be installed.

Step 3: All the TTX-Platform functionalities are described in the enclosed help.

Step 4: The kit provides power to the connected device.

3. Precautions

- Connect only one device at a time to M12TX-CONFIG-SET kit.
- M12TX-CONFIG-SET kit must be used only to program the Omega's devices listed above. Improper use with third-party devices may cause the kit to break or malfunction.
