

### Statement of Intent – Responsible Energy Use

DwyerOmega, is committed to using energy responsibly as a key part of its sustainable business operations. We understand that using energy efficiently helps reduce our impact on the environment, supports climate resilience, and strengthens our long-term performance.

Because of this, we aim to reduce energy use across all our facilities by adopting energy-efficient technologies and helping our teams around the world stay aware of good energy use practices.

We regularly track and report on our energy usage performance to remain compliant and identify areas where we can improve. Through these efforts, we can support our global sustainability goals while continuing to deliver industry-leading solutions in the markets that we operate in.

We encourage everyone involved with the organization to play their part in using energy responsibly.

This policy statement shall be reviewed at least annually, to ensure it continues to reflect the structure and activities within the organization.

N. Mizuta

President, DwyerOmega
