

## Statement of Compliance with Persistent Organic Pollutants (POPs)

### Overview

Regulation (EU) 2019/1021 about persistent organic pollutants (POPs) deals with the protection of the human health and the environment against these substances by a preferably early elimination of production or accordingly by the limitation to a minimum regarding manufacturing, placing on the market and usage of these substances.

Furthermore, the regulation defines provisions about waste which consist of these substances, in which these substances are contained, or which are contaminated by these substances.

### Company Statement

DwyerOmega manufactures and provides a wide portfolio of temperature, pressure, flow sensing and monitoring equipment and associated products. The constituents or chemistry of the products DwyerOmega manufactures and provides are listed in the POPs database. DwyerOmega hereby declares that according to regulation (EU) 2019/1021 there are no persistent organic pollutants in our products.

The above information is based on our current level of knowledge from suppliers and third-party compliance partners. Please note that our material and component suppliers may not reveal proprietary ingredients. DwyerOmega therefore makes no warranties, expressed or implied, and assumes no liability in connection with the accuracy of this information.

DwyerOmega makes every effort to source products responsibly. We also want our customers to make informed purchasing decisions including learning more about POPs. For more information, please visit the following website: <https://echa.europa.eu/understanding-pops>.

Be assured, DwyerOmega will continue to monitor the POPs regulations for any new chemicals and inform its customers accordingly.

Regards,

DwyerOmega Product Compliance Department
