# **Omega Link Pressure Monitoring** and Control Smart Probe

- Low-cost smart pressure sensor
- All stainless-steel body
- No excitation required
- Battery powered long-range wireless capable with
- 2x digital I/O (monitor input or control output)
- 10,000+ sample data/event logging
- Integrated alarm and control
- Secure authentication and password protection

Omega's Omega Link Pressure Monitoring Smart Probes measure gas, liquid, and vapor pressure for a wide range of applications. Featuring all stainlesssteel pressure sensor construction and available in 1, 50, 100, and 250 psi configurations. No excitation is required as power is provided by Omega Link modular wireless or wired interfaces via a rugged M12 connector.

Users may apply a calibration correction to the measured pressure using either 1 single offset or a calculated 2-point correction for improved accuracy across the entire measurement range.

Temperature data is also available for monitoring the internal temperature of the pressure sensor.

#### **Smart Core Enabled**

Smart Core is integral to all Omega Link Smart Sensing Devices. In addition to allowing for modular integration to the Omega Link Ecosystem using any Omega Link Smart Interface, this powerful suite of advanced features enable plug-andplay connectivity, alarm and notifications, data logging, SYNC configuration, and storage of 10,000 data points and events.

### **Intuitive Configuration**

Configure your Omega Link Smart Probe using our free SYNC configuration software. Configurable features include selective data extraction, measurement and device traceability, local alarms, and adaptive transmission rates.

#### Edge Control and Built in I/O

The Omega Link SP-006 features 2 discrete I/O pins. These can be used for a myriad of applications including driving relays, physical alarms, or sensing dry contacts like door switches. The SP-006

can also be utilized as an edge controller, with autonomous independent decisionmaking capabilities to generate local alarms or provide control outputs based on sensor inputs.

Pairing the SP-006 with the IF-006 Series interface produces a self-contained, longrange, wireless solution. This setup can also be externally powered by adding the UNIV-AC100/240-M8 power adaptor.

\*Note: IF-006 must be paired with an Omega
