

24DT Series

Remote LED Digital Thermometer

SPECIFICATIONS

Features such as detachable sensor power, smart updates, and power supply options make the 24DT the prime choice in LED temperature indicators.

The 24DT-L combines a digital thermometer and light switch in one easy to install package. The waterproof "elbow" engaged illuminated light switch allows operators to turn on the walk-in light easily, even when their hands are full. This industrial duty light switch is rated at 15A and includes an optional gasket for outdoor use. Optional update times to eliminate display fluctuations from repeated door opening.

- RANGE: -40/230°F & -40/110°C
- POWER SUPPLY OPTIONS: 12V AC/DC, 110V AC, 230V AC
- MOUNTING OPTIONS: Thermometer only, Switch plate, Switch plate with lighted switch
- UPDATE OPTIONS: 1-second, 1-minute, 3-minutes
- BATTERY BACK-UP: Optional 9-volt battery harness
